ABOUT US

All was well and good for a set of youngsters. They were happy with their day job, a well-paid salary with a content lifestyle. Until one day when they got sick of being stuck in a safe zone. They built their ambitions, they aspired to become something more than a bunch of youngsters. They were tired of impressing people. They wanted to inspire.

Having spent ample time in the trade, they knew what they could do as entrepreneurs. They dreamt of a better world. They realized their role in building such a world. They wanted to lead from the front. Born out of an ambition to inspire and their knowledge of a technology, TeleCMI took shape in 2016. With good knowledge of the industry and continuous innovation, TeleCMI is roaring to become the next big thing. Meet us and experience the next gen internet communication for business and others.

`bonjour`

CLICK2CALL

Delight your Customers

Click2call can be implemented for any type of business who focus on their website as the primary source of information. Our Click2call feature allow the end user to directly connect with a representative avoiding the time gap like an call feature provides. It also ensures genuine leads and secure information.

KEY

-

`cost-effective`

CONTACTHUB

Engage your Customers

Drive your Professional call center setup for both 'Inbound' and 'Outbound' calls more effectively and efficiently with advanced features and best Voice Clarity at reduced call rates. Change everything with a single click login with 'TeleCMI' dashboard.

NATIONAL / INTERNATIONAL TOLL-FREE NUMBER

Give your customers a privilege of calling your business for free with a toll free number. A toll-free telephone number or free phone number is a telephone number that is billed for all arriving calls instead of incurring charges to customers.

Internet calling

Multi-level IVR

CRM Integration

BROWSER SDK & MOBILE SDK

A software development kit (SDK or "devkit") is typically a set of software development tools that allows the creation of applications for a certain software package, software framework, hardware platform, computer system, video game console, platform.

Call Recording

Call Routing

Real-time Analytics

INTERCONNECTIVITY WITHIN ORGANIZATION GLOBALLY

TeleCMI provides the privilege of 'Interconnectivity' globally within the organizations. Through Interconnectivity, a company can contact/connect their branches both national and international.

Notification

Online Recharge

Offline call to Mobile Number

INTERNET CALLING

Internet calling (commonly referred to as VoIP) allows users to call other people via their computer. These calls can either be PC to PC calls or PC to phone calls. By using the Internet for your phone service, long distance calls are free and international rates are cheaper than a calling card.

Voice Mail

Personalized IVR

Configure your Outbound Number

`curious`

TALK2FOLKS

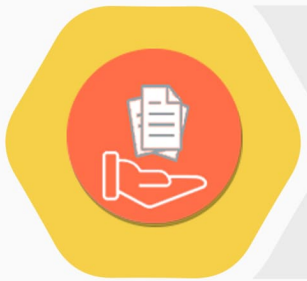

Surprise your Customers

With Talk2folks, you can make bulk calls at one shot with pre-recorded voice messages to any mobile number or landline number across the country. Talk2Folks is one of the important and leading marketing tool with fully automated voice campaigns which is widely used.
